About Stephen

Stephen's work is a powerful combination of self inquiry and investigation into the truth. His energetic inquiry involves the body, mind and heart, which guides one's experience from conceptual understanding to direct experience. He creates a space of loving acceptance of what is that greatly supports people in embracing their total experience and relaxing open into ever-present freedom, joy and aliveness.

"Stephen Kearny is the embodiment of gentle, playful, astonishingly clear wisdom. I highly recommend sitting with him. His exploration of the body mind as unlimited divine energy is fascinating and liberating. Join him in exploring True Nature in its simplicity and extraordinary expression." Pamela Wilson
